

ERRATUM

While all possible care was exercised during preparation of Vol. 44–45 (2015) of the *Israel Journal of Entomology*, an embarrassing omission occurred inadvertently and the caption for the cover image was left out of the inside cover page.

The caption should read

Larva and adult of *Epomis circumscriptus* (Duftschmid, 1812), a ground beetle (Coleoptera: Carabidae) with a unique biology, is reported from Jordan for the first time by Yanai *et al.* (this issue). Both adults and larvae of this species feed on amphibians. Photo: Gil Wizen.

The editor apologizes to readers of the journal and the author of the photographs, Mr Gil Wizen, for this mistake.
